

Olist Executive Playbook

Strategic decision guide for the ExecuMind AI Executive Intelligence Platform built on the Olist Brazilian E-Commerce dataset.

Scenario 1: Sales Decline

- Analyze revenue by product category, region, and seller.
- Identify declining customer segments.
- Review customer complaints and delivery issues.
- Launch targeted promotions and retention campaigns.
- Improve fulfillment performance.

Scenario 2: Customer Ratings Decline

- Analyze negative reviews using sentiment analysis.
- Identify recurring complaint themes.
- Audit seller performance.
- Improve customer support processes.

Scenario 3: Delivery Delays Increase

- Monitor on-time delivery rate.
- Identify logistics bottlenecks.
- Review regional delivery performance.
- Optimize fulfillment workflows.

Scenario 4: Customer Retention Drops

- Use RFM analysis to identify at-risk customers.
- Launch loyalty programs.
- Offer personalized promotions.
- Track repeat purchase behavior.

Scenario 5: Forecast Shows Revenue Risk

- Review forecasting results.
- Identify declining categories.
- Prepare mitigation plans.
- Monitor KPIs weekly.
